## FLUORSPAR BRIQUETTES - TECHNICAL DATA SHEET

### CHEMICAL ANALYSIS (DRY BASIS)

| PARAMETER             | GUARANTEED MINIMUM | TYPICAL             |
|-----------------------|--------------------|---------------------|
| CaF <sub>2</sub>      | 90% min            | Per-lot COA governs |
| SiO <sub>2</sub>      | 5% max             | Per-lot COA governs |
| Sulphur               | Nil                | Per-lot COA governs |
| Phosphorus            | Nil                | Per-lot COA governs |
| Moisture (as shipped) | 0.5% max           | Per-lot COA governs |

Typical values are indicative only. The Certificate of Analysis (COA) issued per consignment at load port governs the actual lot.

### PHYSICAL PROPERTIES

|         |                                              |
|---------|----------------------------------------------|
| Form    | Briquettes                                   |
| Sizing  | 10-50 mm                                     |
| Packing | Bulk, or 1.0 / 1.25 MT jumbo bags on request |
| Origin  | South Africa                                 |
| HS code | 2529.21                                      |

### APPLICATIONS

- Furnace-ready charge for steelmaking

**Basis statements.** CaF<sub>2</sub> content is reported on a dry basis. Moisture is settled against the independent certificate issued at load port, Durban.
